## **DETAILED ACTION**

### ***Specification***

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required. Claim 1 calls for the pivot axes are "at a fixing spacing" during pivoting which does not appear in the specification. Applicant points out in page 7, paragraph 3 of the Remarks that paragraphs [0023], [0024]. However these paragraph do not support the latter.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 5, 7, 11-14, 16-21, 25-28, 30 and 32 are rejected under 35 U.S.C. 102(a/e) as being anticipated Fornara (5,855,348)

Fornara shows a support for a "detachable" shower head including a mounting fixture (12); a wall-mounting arm (14) jutting out of mounting fixture along a longitudinal axis; a shower head 52 coupled to a water supply by a shower hose, holder (48) holding a shower head in the vicinity of an end of the wall mounting arm opposite from the pivoted end of the wall mounting arm, the holder (48) being on a pivot axis that is parallel to the pivot axis of the wall-mounting arm at mounting fixture, wherein the pivot axes are parallel and at a fixed spacing during pivoting of the holder, Wherein the

shower head is configured to spray water supplied by the shower hose, and remains functional following withdrawal of the shower head from the holder.

Regarding claim 3, note that the pivot axis of the holder is approximately orthogonal to a longitudinal axis of the wall mounting arm.

Regarding claims 5 and 17, also note that the wall-mounting arm pivots on the mounting fixture about an axis in a horizontal plane.

Regarding claims 11, 16, and 30, note that the pivot axis of the holder (as identified supra) is approximately orthogonal to the longitudinal axis of the arm (parallel and through 14) (Figs 1-3). Furthermore, the holder axis intersects the housing (outer most portion) of the shower head 52 relatively "near" a centroid thereof.

Regarding claims 18 and 21, the holder has a seat (50) with two arcuate edges which defines a "jaws" (matching the outer counter of the showerhead/housing), for engaging the shower head (52). (Fig. 2,3).

#### ***Allowable Subject Matter***

4. Claims 8, 9, 22-24, 29 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

5. Applicant's arguments filed on 06/10/2008 with respect to Gansow et al have been considered, but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
